

BASFIBER® ROVING

Basfiber® roving of this series is mainly recommended for filament winding, pultrusion, processing into woven fabrics, UD tapes and multiaxial fabrics, prepregs and other products based on polyester, vinyl ester and epoxy resins.

NOMENCLATURE

Our nomenclature is based on three letter followed by three numbers split by dot and dashes.

Example: RAS-13.1200-11

The first letter will be always R which stands for our Rovings products. The following letters AS – GN – DR represent the roving type:

AS - Assembled Roving: External unwinding bobbin roving with on a tube or Internal unwinding (tubeless).

GN - Gun Roving: Internal unwinding (tubeless)

DR - Direct Roving: Direct Unwinding

APPLICATIONS

High pressure vessels, CNG cylinders, boat building, bridge profiles, concrete reinforcing bars, fabrics for sound and heat insulation and for corrosion applications.

THERMAL OPERATION RANGE OF BASFIBER®

Thermal load duration	Temperature range
Permanent	From -260 up to +400 °C
(1) Stage 1: amorphous fiber with sizing on the fiber surface	Up to +200 °C
(2) Stage 2: burning of sizing (10-15 minutes), amorphous fiber	From +200 up to +350 °C
(3) Stage 3: amorphous fiber without sizing on the fiber surface	From +350 up to +400 °C
Short term (few minutes)	From +400 up to +850 °C
(4) Stage 4: transition of FeO into Fe2O3 and beginning of crystallization	From +400 up to +850 °C
Short term (few seconds)	From +850 up to +1250 °C
(5) Stage 5: all the Fe2O3 is in crystal form, the material is extremely brittle, its mechanical properties are extremely poor but without stress and vibration it continues working as thermo insulation pretty good	From +850 up to +1050 °C
(6) Stage 6: sintering temperature	From +1050 up to +1250 °C

PACKAGING INFORMATION

Rovings are supplied on a 120x80 cm pallet with 2-4-6 layers, each bobbin wrapped in thermal retractable film.

LINEAR DENSITY, TEX	DIAMETER	HEIGHT	NET WEIGHT BOBBIN, KG			
90	200mm	255mm	3	4	-	-
110-350	200mm	255mm	3	4	5	-
350-840	200mm	255mm	3	4	5	8
On a 4-layered pallet could be supplied			60 bobbins - ca. 180 kg	60 bobbins - ca. 240 kg	56 bobbins - ca. 280 kg	44 bobbins - Ca. 352 kg
On a 6-layered pallet could be supplied			90 bobbins - ca. 270 kg	90 bobbins - ca. 360 kg	84 bobbins - ca. 420 kg	66 bobbins - ca. 528 kg
